

TUSHAR YADAV

(657) 615-0130 | tushar.yadav@csu.fullerton.edu | [linkedin.com/in/tusharyadav1812](https://www.linkedin.com/in/tusharyadav1812) | Los Angeles, CA

PROFESSIONAL SUMMARY

- Computer Science Graduate Student at California State Fullerton, studying Advanced Database, Cloud Security and Software Development courses.
- Solution-focused middleware engineer with 4 years of prior experience in developing Middleware, ETL pipelines and Web Apps. Extensive experience in using cloud services, relational databases, and backend frameworks.

EDUCATION

California State University Fullerton, California, United States

Master of Science, Computer Science

Aug 2023 - May 2025

SRM Institute of Science and Technology, Chennai, India

Bachelor of Technology, Information Technology

CGPA: 7.31

June 2015 - May 2019

TECHNICAL SKILLS

- **Key Skills:** - Web application development, API development, Microservice architecture design, Database Management Systems, ETL Data Pipeline, Performance Tuning, Computer Programming, Computer Networking
- **Cloud Services:** - Azure Functions, Azure Data Factory, Azure SQL Server, Azure App Service, Azure Redis, Azure Storage, AWS Lambda, AWS EC2, AWS SQS, AWS S3, AWS EMR, Security, web3, Enterprise
- **Tools and other Skills:** - Python, MS SQL Server, Excel, Power BI, SQL Server Management Studio, Postman, web scraping, Flask, Django, Fast API, Pandas, NumPy High charts, PostgreSQL

EXPERIENCE

Interco

API Development Intern

St. Louis, MO, United States

May 2024 – August 2024

- Implemented a database optimization strategy that increased the ERP web apps search speed by 50%.
- Implemented multithreading in the ERP system to boost performance and optimize concurrent data processing.
- Developed and maintained RESTful APIs for ERP system using Fast API.

ITC Infotech (on contract at ZS Associates)

Associate IT Consultant

New Delhi, India

November 2021 – August 2023

- Engineered REST Web Services utilizing Azure Functions and Flask to streamline processes.
- Led a cross-functional development team in backend and data engineering for application development.
- Implemented Kafka scripts, facilitating the handling of 1000+ live stream sensitive data requests.
- Implemented security features, including OAuth 2.0, Azure AD services, and JWT, to implement security
- SQL Query optimization and wrote multiple stored procedures to automate data processing in SQL Server.
- Managed and developed services orchestrating Spark jobs on AWS EMR, providing EMR step details for execution.

Larson and Toubro Technology Service

Software Engineer

Vadodara, India

May 2019 - November 2021

- Engineered Python scripts, leveraging organizational knowledge and an NLP-based platform for data extraction automation, achieving a 70% accuracy rate, and saving 25 hours of manual work weekly.
- Developed and troubleshooted a scalable Data Lake Architecture for 50M+ weekly structured and unstructured records.
- Implemented comprehensive ETL processes for seamless data transfer from source files and databases to analytical tools.
- Automated tabular data extraction in PDFs using Tableau library, exporting it to a predefined report format, reducing manual data entry generating quality results.

SPI Cinemas

Intern

Chennai, India

June 2017 - July 2017

- Responsible for designing wireframes for the company's upcoming website using Adobe XD and Figma.

PROJECTS

Crop Yield Prediction using Local Geographical Parameters and Machine Learning

- Developed an ML system utilizing regression algorithms to predict crop yields. Leveraged user-provided data (rainfall, soil erosion, temperature) and government historical crop data to assist farmers in crop selection.

Realtime Market Data Analytics using Kafka and PySpark

- Engineered a data pipeline that retrieves data from Streaming Data APIs and processes it in real-time in Spark through Kafka messages.

LEADERSHIP EXPERIENCE & RECOGNITIONS

- Led a developer team at ZS Associates to construct web applications for pharmaceutical companies in 2022.
- Acknowledged at ZS Associates for the delivery of high-grade applications in 2023.
- Served as the Technical Organizer for the National Level Hackathon Fest at SRMIST in 2017-18.
- Received Spot Awards from Larson and Toubro Technology Services in 2019-20 for automating data extraction.
